## ASBMR Updates & Announcements

September 4, 2014

### ASBMR 2014 Annual Meeting Mobile App Now Available

ASBMR members and Annual Meeting attendees can now access the mobile version of the ASBMR 2014 Annual Meeting on-site program that includes the meeting abstracts, session details and exhibitor listings. To download the app, go to the app store on your smartphone or mobile device and search: "ASBMR 2014." This year's app works seamlessly with the [ASBMR Abstracts Online](#) and [Itinerary Builder](#), allowing users the ability to log in and view their saved sessions and abstracts via the mobile app. If you have any questions, please contact the [ASBMR business office](#).

### Congratulations to the 2014 Frederic C. Bartter Awardee, Richard Eastell, M.D., FRCP

The Frederic C. Bartter Award is given to an ASBMR member in recognition of outstanding clinical investigation in disorders of bone and mineral metabolism. Congratulations to this year's award recipient, Richard Eastell, M.D., FRCP.

Dr. Eastell is Professor of Bone Metabolism and Director of the Mellanby Centre for Bone Research at the University of Sheffield. He trained in endocrinology in Edinburgh, Northwick Park and at the Mayo Clinic. He leads a research group on the pathogenesis, diagnosis and treatment of osteoporosis; of particular note is his contribution to the use of bone turnover markers. His wide-ranging contributions are recorded in more than 380 publications that have had an impact not only in understanding pathophysiology, but also on the practical clinical management of bone disease.

### NOF Hosting FLS Model of Care Training at ASBMR 2014 Annual Meeting

The National Osteoporosis Foundation (NOF) will host an event next week in conjunction with the ASBMR 2014 Annual Meeting in Houston, Texas, USA. The Fracture Liaison Service (FLS) Model of Care Training program will occur on Thursday, September 11, from 8:00 a.m. – 3:30 p.m. at the Hilton Hotel. The goal of the program is to prepare FLS

coordinators and physician champions to implement FLS programs and is intended for nurses, nurse practitioners, physician assistants and physicians. More information and registration details are available on the [NOF website](#).

### Congratulations to the 2014 Raisz-Drezner Awardee, Todd Bredbenner, Ph.D.

Congratulations to the 2014 Raisz-Drezner awardee, first author Todd Bredbenner, Ph.D. The ASBMR Raisz-Drezner Journal of Bone and Mineral Research (*JBMR*<sup>®</sup>) First Paper Awards honor first authors of meritorious scientific publications published in *JBMR*<sup>®</sup>. The award-winning paper is "Fracture Risk Predictions Based on Statistical Shape and Density

Visit *JBMR*<sup>®</sup> Online  
*Journal of Bone and Mineral Research* is the highest-ranked journal in the field, with an impact factor of 6.589.

**ASBMR e-News Weekly**  
Compiled exclusively for ASBMR members, the e-News Weekly provides the latest Society information, the most recent articles that have

Modeling of the Proximal Femur." The paper is included in the *JBMR*<sup>®</sup> e-Compendium, Raisz-Drezner First Paper Award Winners 2008-2014.

**Free Copies of *JBMR*<sup>®</sup> Perspective on Reproducibility of Results in Preclinical Studies at Annual Meeting**

Be sure to pick up your free copy of the timely *JBMR*<sup>®</sup> perspective, "Reproducibility of Results in Pre-Clinical Studies: A Perspective from the Bone Field," at the ASBMR 2014 Annual Meeting. Authors Stavros Manolagas and Henry Kronenberg review the impact of poor reproducibility in the field of bone and mineral research and beyond and suggest measures to alleviate the problem. Emphasizing that

all those engaged in research must take responsibility for the quality of their research and how it is communicated in the published literature, the authors add that scientific journals also have a major role to play in enhancing reproducibility and ensuring that self-correction is not stifled. The need for more careful consideration of publication of negative studies, which are often rejected because of a perceived lack of impact, is also discussed. An introduction by Editor-in-Chief Juliet Compston gives a brief overview of growing concerns about the reproducibility of biomedical research (see "Policy: NIH Plans to Enhance Reproducibility.")

**ASBMR 2014 Annual Meeting Highlight: Improve Your Chances of Getting Published**

Meet with *JBMR*<sup>®</sup> Editor-in-Chief Dr. Juliet Compston at this year's *Publications Workshop* in Houston, Texas, USA. You'll learn how to improve the quality of your journal manuscripts, what *JBMR*<sup>®</sup> is looking for and how to increase your chances of getting published. Wiley Senior Marketing Manager Larry Grodsky, Wiley Publisher Jinnie Kim, and Wiley Associate Editor Katie Simmons will also update you on maximizing visibility for your paper, navigating the submission process and timeline, and taking advantage of the latest technology. Whether you're a new author considering submitting a paper or a seasoned journal contributor, don't miss this unique opportunity to hear directly from and interact with *JBMR*<sup>®</sup>'s editor!

**Publications Workshop: Improve Your Chances of Getting Published, Friday, September 12, 9:30 a.m. – 11:00 a.m., George R. Brown Convention Center, Room 332D, Houston, Texas**

**About the ASBMR**

The ASBMR is the leading professional, scientific and medical society established to bring together clinical and experimental scientists involved in the study of bone and mineral metabolism. The ASBMR has a membership of nearly 4,000 physicians, basic research scientists, and clinical investigators from around the world.
