

Patient and Public Involvement in Research

Sheffield Teaching Hospitals Combined Community and Acute
Care Group

Is this for me?

Do you live in Sheffield, have experience of health and or social care services and have an interest in improving how they work?

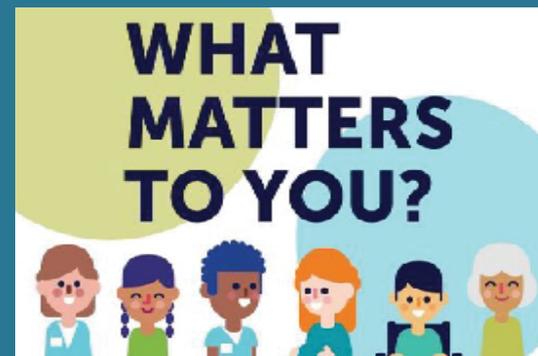

Sheffield Teaching Hospitals Combined Community and Acute Care Group need your help.

Your experience, knowledge and understanding are really important. You do not need any qualifications or previous knowledge of research just a willingness to share your views.

What would be involved?

You will be given training and ongoing support. Our **across the care group panel** meets online every 3 months to share their thoughts on:

- Research topics and ideas
- Research proposals (what a researcher is planning)
- Ideas for patient information leaflets

If you are not able to attend meetings or don't have online access the **community of Elders** panel may be for you! We can visit you at home to discuss your opinions and share these with the researcher.

Please note this is a voluntary role so you will not receive payment for your involvement.

If you are interested and would like more information please contact jo.burke@nhs.net, 07970 488171 or rowan.waring@nhs.net, 07772 939696
